👤 PROFESSIONAL SUMMARY

Detail-oriented Computer Science graduate with 3+ years of experience within Apple's high-standards operational environment. Experience in iOS development with the ability to identify, document, and resolve software defects across the full development lifecycle. Experience in designing comprehensive test plans and collaborating across multi-functional teams to drive software excellence. Brings strong analytical thinking from a fast-paced Apple retail environment with a customer-focused mindset to every project.

🎓 EDUCATION

Bachelor's Degree - Computer Science, *California State University, San Marcos* 08/2024 – 05/2026
San Marcos, CA

- Developed strong foundations in software systems, designing test plans and cases, and collaboration with others towards a shared goal
- Relevant Coursework: Software Engineering, Artificial Intelligence, Data Structures, Operating Systems, Cloud Computing
- Key Projects: DNA Sequence Prediction (Machine Learning Logistic Regression), "PinFit" Web Application (UI/UX), "HypoKrytez" (GCP/GKE)

Associate's Degree - Math and Science, *Palomar College* 2022 – 2022
San Marcos, CA

- Built analytical problem-solving skills across mathematics, biology, and scientific reasoning

🏢 PROFESSIONAL EXPERIENCE

Operations Specialist, *Apple Inc.* 10/2022 – Present
Carlsbad, CA

- Operate within Apple's high-standards environment, maintaining strict quality control and compliance with operational procedures across all workflows.
- Coordinate cross-functionally with leadership and team members to communicate task status, escalate issues, and ensure process adherence.
- Maintain meticulous attention to detail managing inventory accuracy, reporting discrepancies, and upholding Apple's visual and operational standards.
- Demonstrate adaptability and self-motivation in a fast-paced, dynamic retail environment with frequent process changes.

📁 PROJECTS

Motion of the Day, *iOS App*

- Independently designed, developed, and deployed a Swift-based iOS application.
- Conducted structured manual testing across multiple iOS versions and device configurations to identify and resolve UI regressions and performance bottlenecks.
- Authored test plans covering core user flows and error handling
- Utilized Xcode and lightly used Instruments to profile app performance and ensure a rock-solid user experience.

gabrielsaucedo.codes, *Portfolio Website*

- Built a responsive portfolio site using HTML, CSS, and JavaScript to showcase projects, skills, and professional background, while performing cross-browser and cross-device testing to ensure consistent functionality

🔧 Technical Skills

- Programming (C++, Python, Swift)
- Git/Version Control
- iOS, macOS, watchOS
- Defect Documentation & Tracking
- Functional/Regression Testing
- Test Plan Design
